

BRAINS BEAT BRAWN ANY DAY

Separates oil from coolant and returns clean coolant to sump. Increases coolant lifetime. Reduces disposal costs because it removes only oil. Saves time and labor.

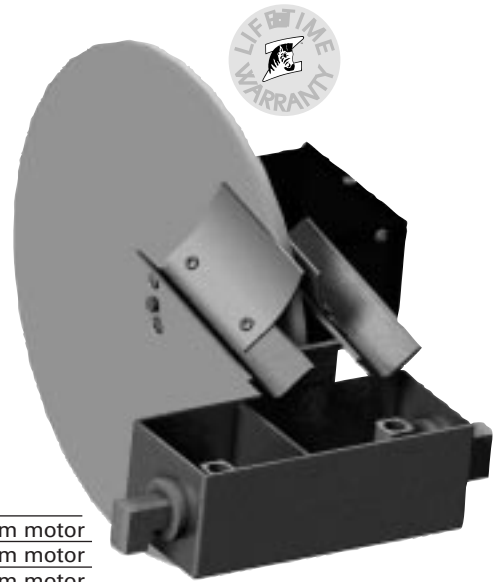

- Unbreakable disk (lifetime guarantee)
- Wipers that don't need adjustment (lifetime guarantee)
- Patented gravity separator
- Continuous-duty fan-cooled motor with a one year warranty
- Rated at 2 litres/hour

Coolant is expensive to buy and dispose. It can be destroyed quickly by anaerobic bacteria if tramp oils are not removed. Zebra's GS disk skimmer solves these problems. It automatically separates and removes the tramp oil, extending the coolant's usefulness.

GS Series

Part #	Description
ZGS4H300	305mm Disk Skimmer w/gravity separator and fan-cooled 7 rpm motor
ZGS4H460	457mm Disk Skimmer w/gravity separator and fan-cooled 7 rpm motor
ZGS4H610	610mm Disk Skimmer w/gravity separator and fan-cooled 2 rpm motor

Replacement parts and prices also available.

IMPOSSIBLE SUMPS REQUIRE A ZEBRA SIDEWINDER™

Eliminates tramp oils extending tooling and coolant life. Requires minimum opening 12mm x 76mm. Prevents rancidity and other health hazards. Compatible with Zebra Diverter™.

Skim from underneath the chip conveyor, or on the back of a lathe. It even works on a totally enclosed machine. Installs in minutes.

- Can reach from 20 to 152 cm (optional)
- Continuous-duty fan-cooled motor
- Long lasting ceramic scraper is outside the unit, so chips don't clog the drain
- Large discharge port for easy cleaning
- Oil removal capacity rated at 1 litre per hour
- One year warranty on all parts
- 240 volt
